Closing Remarks

We, from Group 8, feel incredibly grateful for the opportunity and the wonderful collaborative experience we had while completing this assignment. Our group dynamics flowed well, and we truly enjoyed every discussion and collaboration as a team. We are highly satisfied with the strong bond and teamwork we built throughout this process, and most notably in navigating through the final plot twist at the very end of our submission process.

In closing, we would like to express our deepest appreciation and gratitude to our lecturer, Mr. Faisal, for the guidance, direction, and knowledge provided throughout this semester. We feel extremely lucky to have a lecturer who is always so supportive and encouraging at every turn. Honestly, it is rare to find a lecturer as cool and fun as you, Mr. Faisal.

All the experiences and insights we have gained in this class are highly valuable for our future academic and professional development. We hope that the work we have compiled will meet the grading criteria well.

Sincerely yours,

Group 8.

Kelvin Leandi, Gavinn Aloys, Nathanael Setiorahardjo
